## PROFESSIONAL SUMMARY

AI Product Manager and MBA candidate with **2.7+ years** of experience across BMS automation, ERP rollout, dashboards, UAT, and cross-functional execution. Built AI product prototypes using **RAG, MCP, app-review intelligence, workflow automation, and source-grounded responses**. Skilled in converting user pain points into product scope, user stories, MVP flows, success metrics, dashboards, and release-readiness workflows. Seeking Associate Product Manager / AI Product Manager roles focused on AI workflows, product analytics, and scalable user-impact-driven products.

## EDUCATION

### Master of Business Administration (M.B.A)

*Manipal University*

### NextLeap Product Manager Fellowship

*NextLeap*

### B.Tech in Electrical & Electronics Engineering

*CV Raman Global University*

Mar 2026 – Ongoing

*Udupi, KA*

Feb 2026 – May 2026

*Remote*

Aug 2019 – Aug 2023

*Odisha, IN | GPA: 8.0/10.0*

## PROFESSIONAL EXPERIENCE

### User Growth Intern | Paytm

*One97 Communications Limited*

Jun 2026 – Ongoing

*Remote*

- Gained exposure to **FinTech-scale** operating practices, remote execution, data handling, and structured task ownership.
- Supported business workflows involving dashboards, **ERP rollout, UAT, stakeholder coordination**, and **AI workflow** prototyping to contribute to structured execution and operational improvement.

### Project Manager | BMS Automation & Delivery Intelligence

*Streamline Refrigeration Pvt Ltd*

Aug 2025 – Present

*Bengaluru, IN*

- Managing **8+ BMS/industrial automation projects**, converting site requirements into milestone plans, dependency trackers, risk logs, acceptance checklists, and handover workflows.
- Reduced project delays by **20%** through AI-assisted project tracking, automated status reporting, dependency visibility, blocker escalation, and structured stakeholder follow-ups.
- Improved commissioning and UAT readiness by **15%** by standardizing site test checklists, acceptance criteria, defect tracking, documentation workflows, and release-readiness reviews.
- Improved resource utilization by **25%** through sprint-style planning, capacity tracking, vendor coordination, issue escalation, and proactive risk mitigation.

### Engineer - Design & Planning | ERP, Analytics & Process Automation

*Toshiba Mitsubishi Electric Industrial Systems Corporation*

Sep 2023 – Jul 2025

*Bengaluru, IN*

- Delivered **5+ ERP, dashboard, and digitization initiatives**, improving operational efficiency by **15–20%** across production, procurement, and planning teams.
- Gathered requirements from **30+ stakeholders**, mapped pain points, documented workflows, and translated business needs into reporting and process-improvement solutions.
- Supported ERP rollout through **UAT planning, defect tracking, workflow validation, user training, and adoption support for 40+ users**.
- Reduced manual reporting errors by **30%** and maintained **95% on-time delivery** using dashboards, CPM planning, schedule variance tracking, and review cadences.

## AI PRODUCT PROJECTS

### Making AI Outputs More Trustworthy Prototyping for Claude | *AI Product, User Research, UX, Metrics*

- Built a product case study for a **Trust Lens** in Claude to help users evaluate AI outputs are correct, complete, well-reasoned, useful, and appropriately uncertain before acting on them.
- Conducted mixed-method research with **40+ survey responses and 6 user interviews**; identified that **71.0%** of users had low confidence judging AI output quality when they were not domain experts.
- Defined the core problem as the gap between **perceived quality and actual output quality**, where polished AI responses create over-trust and make missing context, assumptions, and weak reasoning harder to detect.
- Prioritized solutions using the **Impact-Confidence-Effort framework**; selected **Trust Lens+ Recheck** as highest-priority.

### RAG-Based Mutual Fund FAQ Chatbot for Groww | *RAG, Retrieval, Guardrails, FinTech*

- Built a facts-only RAG assistant for mutual fund FAQs using **25+ official AMC, AMFI, SEBI, KIM, SID, factsheet, and service-page sources**.
- Designed a retrieval-first flow: **ingest → clean → chunk → embed → retrieve → grounded response**, reducing hallucination risk for financial queries.
- Defined product guardrails including citation-first answers, refusal logic for investment advice/performance predictions, and PII protection.

## PRODUCT & TECHNICAL SKILLS

**Product Management:** User Research, PRDs, User Stories, MVP Definition, Roadmapping, Prioritization, UAT, Agile/Scrum, Stakeholder Management

**AI Product Skills:** RAG, MCP Workflows, AI Agents, Prompt Engineering, Retrieval-First Design, Guardrails, Human-in-the-Loop Review

**Metrics & Tools:** Product Analytics, KPI Dashboards, Success Metrics, Jira, Confluence, Figma, Power BI, Excel, Vercel, Render

**Domain Knowledge:** FinTech, Mutual Funds, App Reviews, BMS, Industrial Automation, ERP, SaaS/B2B Workflows
