

MATIKS: From Doom Scrolling to Math Champions

A strategy to transform MATIKS from a free math gaming app into India's school-led national math championship platform.

What Is MATIKS today ?

MATIKS is a math and brain-training app where users solve problems, compete in challenges, build streaks, and improve their speed, accuracy, and logic.

The product already has three powerful signals:

- 1.Users enjoy the gameplay
- 2.Users return because of progress and competition
- 3.Users already see it as more than casual entertainment

Existing proof:
users already love the learning
+
competition loop.

Something different

★★★★★

Udday Singh

I absolutely loved playing on Matiks! The games are super interesting and have that perfect mix of fun and challenge. What I really enjoyed is how tricky they can get — you can't just play casually, you actually have to stay fully focused and think smart. It's the kind of platform that keeps you hooked while also testing your mind. Highly recommend it if you enjoy games that are engaging and make you stay sharp!

Rewiring of phone usage

Came across this app. Last year, have only tried the maths part. The sprint version till date, but I love it and maybe we'll play more from now on. It's a great game and just tried after a while. Then you have to feedback when I am trying to put on the answer of that loving that great work by the team.

The Problem MATIKS is Solving

The goal is not to reduce screen time. The goal is to upgrade screen time.

Students are spending more time on screens, but most of that time is passive.

- Students spend hours on Instagram — zero learning, zero growth, endless distraction.
- Students keep coming back because they can see their progress, rankings, and achievements improve daily.
- Instead of passive screen time, Matiks creates addictive learning through competition and community.

From students to professionals, Matiks transforms screen time into competitive brain training.

1

Aarav Sharma, 14
Competitive Student

- ✓ Wants to improve math speed and rankings
- ✗ Gets bored with traditional learning methods
- ✓ Uses Matiks for streaks, live battles, and leaderboards

GOAL:

Become the top ranker in school.

2

Priya Nair, 28
Working Woman

- ✓ Wants healthier and more productive screen time
- ✗ Feels mentally drained after doom scrolling
- ✓ Uses Matiks for quick brain-refresh sessions after work

GOAL:

Replace scrolling with smarter entertainment.

3

Rohan Mehta, 22
Late-Night Scroller

- ✓ Wants to reduce late-night social media addiction
- ✗ Spends hours on reels and short-form content
- ✓ Uses Matiks for fast-paced competitive gameplay

GOAL:

Stay entertained while sharpening focus.

STREAK

4

Neha Verma, 31
Brain Enthusiast

- ✓ Loves logic puzzles and strategic thinking games
- ✗ Finds most brain-training apps repetitive
- ✓ Uses Matiks for challenging real-time mental battles

GOAL:

Continuously train and test cognitive ability.

MATIKS IS NOT JUST A MATH APP —
IT'S A COMPETITIVE BRAIN-TRAINING
ECOSYSTEM FOR EVERY KIND OF USER.

LIVE BATTLES
Real-time
competitions

LEADERBOARDS
Compete. Climb.
Conquer.

STREAKS
Build streaks.
Stay consistent.

LEVEL UP
Earn XP.
Unlock badges.

IMPROVE
Track progress.
Get better daily.

The Market Gap: Competitive Math Is Still Underpenetrated

CATEGORY	EXISTING APPS	MATIKS OPPORTUNITY
 Math games	   Casual practice, limited depth, low retention.	 Competitive learning Daily challenges, leaderboards, and real competition.
 Brain games	   Entertainment-first, not skill-focused.	 Skill + ranking Builds math & logic skills with measurable progress.
 Olympiad platforms	   Test-heavy, course purchase required.	 App-based daily habit Short, engaging, daily practice inside the app.
 School competitions	   Offline, seasonal, hard to scale, limited visibility.	 Always-on digital championship National reach, continuous rounds, real-time rankings.

MOST COMPETITORS TEACH OR ENTERTAIN.
MATIKS CAN COMPETE, TRAIN, AND CERTIFY.

COMPETE
 Win and rank against others

TRAIN
 Improve skills every day

CERTIFY
 Earn recognition that matters

INSPIRE
 Build confidence and future

The Monetization Risk: Do Not Break the Habit

The app has the habit loop. Now it needs the championship layer

Users may switch accounts or move to free alternatives instead of paying.

- **Account switching** Users can create fresh accounts to bypass limits, paywalls, or trial expiry.
- **Dirty metrics** Signups may rise, but retention, churn, and conversion data become misleading.
- **Free app competition** Many free math and brain-training apps can pull casual users away quickly.
- **Broken trust loop** If core duels, streaks, XP, or tournaments are locked, the app feels pay-first.

Key insight: Monetize ambition, not access

The Rebrand Vision Think Bigger.

The next chapter of MATIKS isn't just an app — it's a **movement**. We bring MATIKS into schools as an official curriculum-aligned competition, just like the Math Olympiad.

School Integration

Official curriculum tie-in
for schools

National Competition

Students compete across
cities & states

Real Rewards

Winners receive bicycles
& recognition

PERCENTAGE OF STUDENTS GIVING MATHS COMPETITIONS & OLYMPIADS IN INDIA

Based on surveys, school participation data & Olympiad registrations (India)

-  Participate in Maths Competitions & Olympiads (28%)
-  Do Not Participate (72%)

KEY INSIGHT

Only **28%** of students in India actively participate in Maths competitions and Olympiads.

PARTICIPATION BREAKDOWN

	School Level Competitions	18%
	National Olympiads (SOF, ITO, etc.)	7%
	International Olympiads	2%
	Regular Participants (Multiple Olympiads)	1%

Opportunities are huge!

72% of students are still unexplored. Matiks aims to bring competitive learning to every student, every day.

MATIKS ALREADY HAS THE HABIT.

THE MISSING LAYER IS...

WHAT MATIKS ALREADY HAS

A STRONG PRODUCT FOUNDATION

ENGAGING GAMEPLAY

Fun math challenges that users love to play.

HIGH RETENTION

Streaks, XP, levels, leaderboards bring users back daily.

STRONG COMPETITION LOOP

Duels, tournaments, and rankings create healthy competition.

ORGANIC GROWTH

Word of mouth, sharing, and user referrals.

HABIT IS BUILT.

NOW IT NEEDS A SYSTEM TO SCALE.

THE MISSING LAYER

THE STRUCTURE THAT TURNS ENGAGEMENT INTO IMPACT & REVENUE

STRUCTURED REVENUE

Monetize through championship entries, not by limiting core gameplay. Free app. Paid competition.

SCHOOL DISTRIBUTION

Partner with schools to onboard students at scale and run official competitions within the app.

OFFICIAL COMPETITION IDENTITY

Create a national championship brand with verified rankings, certificates, and real recognition.

PARENT-BACKED PAYMENT

Parents willingly pay for a credible, educational competition that delivers value, growth, and prestige.

APP BUILDS THE HABIT. COMPETITION BUILDS THE FUTURE.

ENGAGEMENT → ACHIEVEMENT → REVENUE → IMPACT

The product does not need to change first. The perception needs to change first.

Math Games, Puzzles & Friends

Free

The MATIKS National Math Championship

A structured, school-based math competition with real stakes, real prizes, and real prestige.

1

School Onboarding

Schools register and receive the MATIKS

2

Student Entry — ₹499

Students pay a small entry fee to compete in the championship

3

App-Based Rounds

All competition rounds happen
Inside the MATIKS app

4

Grand Finale & Prizes

Top performers win bicycles, certificates, and national recognition

Why ₹499 Changes Everything

Parents do not pay for another app.

They pay for a credible achievement opportunity.

The Psychology of Entry Fees

When students *pay*, they commit.

A ₹499 entry fee creates:

- **Ownership** — they feel invested in the outcome
- **Perceived value** — the prize feels worth earning
- **School accountability** — parents and teachers support participation
- **Revenue without paywalls** — the app stays free, the competition monetizes

The Moat: Why MATIKS Becomes Hard to Copy

School Partnerships

Once a school adopts the MATIKS curriculum, switching is disruptive. Relationships with principals and teachers are a deep moat.

Brand Prestige

A national championship with real prizes builds a brand that free clone apps can never replicate.

Physical Rewards

Gifting bicycles creates emotional, shareable moments. This is marketing money can't buy — it's community.

Business Model: Free App, Paid Championship

0.01%

Total conversion rate

Revenue Projection (Illustrative)

With just 500 schools and
a 40% conversion to paid entries:

$\text{₹}499 \times 10,000$

= ~₹50 Lakhs in championship revenue

90-day plan

Timeline

Action

Days 1–15

Finalize championship brand, rules, pricing, and certificates

Days 16–45

Onboard 50 schools in selected cities

Days 46–75

Run app-based qualifier and leaderboard rounds

Days 76–90

Host finale, distribute prizes, publish winner stories

The app stays free. The competition drives revenue. The brand drives retention.

The Ask: Let's Build This Together

MATIKS has the users. The engagement is real. Now we need the **structure, the brand, and the investment** to take this national.

Pilot 50 Schools

Launch the championship in select cities first

Brand the Competition

Create the MATIKS National Math Championship identity

Fund the Prizes

Bicycles, certificates, and a finale event that goes viral

Scale Nationally

From 50 schools to 5,000 — a math movement across India

BEFORE V/S AFTER

📅 TODAY		🏆 TOMORROW	
WHERE MATIKS IS TODAY		WHERE MATIKS IS HEADING	
	Math and brain game A fun game for practice	➡	 National math championship platform A competitive learning & recognition platform
	Casual app users Individual players, low commitment	➡	 Students, parents, schools A full ecosystem of learners & educators
	Free gameplay only No structured way to monetize	➡	 Paid championship entry Official participation in structured competitions
	Streaks and XP In-app motivation	➡	 Verified ranks and certificates Real achievement with value and recognition
	Competes with games Fighting for casual attention	➡	 Competes with Olympiads Positioned as a serious academic competition
	Weak monetization No dedicated revenue model	➡	 Strong competition revenue Sustainable, scalable, and high-impact

WE DON'T JUST CHANGE THE APP.
WE CHANGE ITS **PURPOSE, POSITIONING, AND POTENTIAL.**
